About

I am passionate about connecting different technologies to create efficient solutions to problems. I learn quickly in challenging environments and enjoy breaking through barriers as part of a team. I believe that passion and perseverance are the keys to success.

Hard Skills

Languages: Ruby, Objective-C, JavaScript, SQL, HTML5, CSS3, Java, C++.

Frameworks: Ruby on Rails, Sinatra, RSpec, Capybara, Jasmine, Angular.js

Tools: Xcode, Testflight, Git, Pivotal Tracker, TDD, Agile, Netbeans, Heroku.

Experience

GMTech San Sebastián – Software Engineer & Director - April 2015 & Present.

GMTech provides software solutions and engineering services for it's customers.

Role: developer, project manager, Q&A, test engineer.

DevBootcamp San Francisco – 19 Week Full Stack Web Development Program - 2015

- 1000+ hours in Web Development and Software Engineering. Worked on short deadline group projects implementing Git workflow, Agile, Pair-programming and TDD.
- Activities: algorithms & white boarding nights, lightning talks, tech breakouts, learning new technologies and built a final project in six (6) days <https://github.com/ormaechea/Scene>

Mobile Makers Chicago – Immersive 9 Week iOS Development Academy - 2013.

- 700+ hours deep dive into Objective-C.
- Worked on small teams using agile development.
- Submitted a final project to the Apple Store that was completed in six (6) days <https://itunes.apple.com/bg/app/gifit2me/id695807638?mt=8>

Projects

Quoting/Budgeting Platform – Ruby on Rails - March 2016.

<http://corporate-quoting-tool.herokuapp.com/>

A Quoting/Budgeting platform for companies that have franchises around the world.
